

International Lime Association

Sponsorship Packages 2024

Background Information

Once a year, the International Lime Association holds a **General Assembly** accompanied by a **Symposium**.

Within this event, owners, decision-makers, and opinion leaders of the International Lime Industry gather to exchange knowledge and stay updated on current trends.

Following a highly successful event in Penang, Malaysia last year, which saw 133 participants, this year the ILA will be heading to the capital city of Oslo, Norway.

The symposium will focus on **Health & Safety** as well as **Climate & Energy** including Carbon Capture, Utilization & Storage, with various experts providing insights on the topic.

Sponsorship Packages

This year as well, ILA offers various sponsorship opportunities to suppliers and business partners of the lime industry. They are moving away from the traditional exhibition with conventional booths and introducing the **ILA Networking Area**.

The **ILA Networking Area** will be the central hub of the event, where people can gather, have coffee breaks, register, and even hold small meetings in a casual atmosphere. Our sponsors will have the opportunity to showcase themselves and their companies on a textile folding display (available in two different sizes), which will become the property of the company after the event.

To ensure a cohesive look, ILA will handle the complete logistics, including shipping to Oslo.

A standing table for displaying brochures or as a meeting point will complement the respective ad space.

The advantage for sponsors is maximum visibility in an inviting atmosphere, without the need for elaborate booth setup and materials.

It follows a modern concept of "less is more", and a high-quality textile folding display that can be used for other purposes in the future.
